

## How can I recycle my old garbage can?

District of Logan Lake – What to do with old garbage cans

In the summer of 2009, the District of Logan Lake is implementing a new automated curbside waste collection program, which requires each dwelling to use new roll-out containers. So what can people do with their old garbage can? Here are some suggestions:

- A rain barrel; put some old tights over the top to prevent mosquito infestation.
- A composter for garden waste.
- As a gardening container – put your gardening tools in it.
- Grow potatoes or carrots in it – drill holes in bottom for drainage.
- Storage for plant pots.
- Grow herbs in it – drill holes in bottom for drainage.
- If water tight, can hold bags of sand and cement.
- Sink into the ground as a small wildlife pond.
- Storage for your recycling.
- Container for horse feed.
